

ROOM 5

01

I am the next chapter in space-based telescope astronomy. I have the ability to detect light beyond the visible spectrum, into the mid-ranged infrared range. I have to be kept cold to keep unwanted sources of infrared light from interfering with the light being observed.

02

I am the earliest form of writing where symbols were used for scripts. I paved the way towards development of other written languages.

ROOM 5

03

We are an extinct species. We are four legged mammals, with a trunk, curved tusks and a tail. We roamed North and Central America from the early Miocene to Pleistocene epoch. We are the family of mammutidae.
